

## NEXT STEPS FOR REINSTALLING YOUR INGROUND POOL LIGHTING SYSTEM GLASSES AND RINGS

If the installation of your new pool liner is complete, it is now time to plan for the reinstallation of the glasses and rings so that you can once again enjoy bright evenings with your family!

**Thank you for supporting a Canadian product!**

Did you know that Lumi-O | InnovaPlas is in business since 1982?

### PRIOR TO THE APPOINTMENT

**MAKE SURE YOUR POOL IS FILLED TO CAPACITY AND THAT THE FOLLOWING TASKS ARE COMPLETED:**

You must **keep the light niches clean**. Remove sand, dirt, rocks, and any possible water accumulation. In fact, it is **strongly recommended to do this maintenance every year** (see back page for more information)!

Also check to see if the lighting system you have is working properly and if any parts need to be replaced. Please notify the call center agent if there is any verification that needs to be done other than the tasks listed in the contract with your pool company.

The technician's job is to **reinstall the glasses and rings**. He will not perform cleaning maintenance for you. If the niches are too dirty to do the work and he has to reschedule an appointment with you, **you may be charged an additional fee**.

#### REQUIRED TOOL:

Wet/Dry Vacuum Cleaner (like a 4HP or 6HP Shop-Vac)

Is your lighting system outdated? Do you think it needs a retrofit? **It is possible to install a new LED system in color or white**. You will find all the details on our website [www.lumi-o.com](http://www.lumi-o.com) or you can ask your local store's representative.

Once our technician has completed the reinstallation of the glasses and rings, you will be able to enjoy it right away, brighten up your yard and evenings!

**Having any questions? Visit our website [www.lumi-o.com/FAQ](http://www.lumi-o.com/FAQ) Or contact us by phone or email:**

## REQUIREMENTS FOR A VALID LED LIGHT WARRANTY

For your LED light warranty to be valid, you must ensure that you follow winterization procedure A. If you have an in-ground pool, you must also follow in-ground pool niche maintenance procedure B.

### PROCEDURE A: LIGHT WINTERIZATION

- 1 **Open the round cover** on the sidewalk \*For in-ground pool only\*;
- 2 **Loosen the 3 butterfly screws** around the light (**DO NOT REMOVE THEM**);
- 3 **Hold the light** and **turn it** a quarter of a turn;
- 4 **Unhook the light** from the ring and **pull it out** onto the sidewalk;
- 5 Follow the wire to the "Quick-Plug" and **unscrew the black bolt**;
- 6 **Separate the wires** (male and female);
- 7 The **female wire must remain in place** in the junction box and it is recommended to **use grease** (e.g. Vaseline) **to avoid corrosion**;
- 8 **Store the light** in a dry, warm place if possible.

### PROCEDURE B: NICHE MAINTENANCE

#### For in-ground pool only

Although the LED light is waterproof, it is not designed to soak in water. If it does and water seeps inside, the warranty will become void and you could lose LEDs until you run out of lights.

To ensure that there is no water accumulation in the niche, be sure to clean the bottom of the housing, where there are holes that allow water to drain out. If these holes become clogged with sand, dirt or rocks, water could reach the light and damage it, voiding the warranty.

#### REQUIRED TOOL:

Wet/Dry Vacuum Cleaner (like a 4HP or 6 HP Shop-Vac)

## WARRANTY

#### IN-GROUND POOL

- LED Light: **3 years** from the installation date by a Lumi-O technician
- Remote control, transformer and installation: **1 year**

#### ABOVE GROUND POOL

- LED Light: **2 years** from the installation date by a Lumi-O technician
- Remote control, transformer and installation: **1 year**
