## A

1) Insert the two Step Cups™ in the holes under the step.\*

**A1)** Insert half of the Step Cup mushroom ring in the hole, at a 45 degree angle.

**A2)** With a flat screwdriver, compress the Step Cup mushroom ring while pushing it into the hole.

**A3)** Twist the Step Cup to ensure that the mushroom ring has entirely cleared the wall thickness. If it has, the suction cup should rotate freely.

2) Align the light cover's two alignment rods into the small holes at the top of the larger hole. Insert the light cover by pressing firmly.

## CAUTION

Failing to install the Step Cup™ system will greatly reduce the steadiness of the step and will void the manufacturer warranty.
