

QUICK START GUIDE

A Download the Innovalite application from the Apple App Store or from Google play repertory available to your phone.

B Install the light as per the previous instruction sheet. Plug the power cord; all the LED should light up and produce white light.

C Turn on the Bluetooth function on your phone and open the Innovalite application. The Innovalite color pool light should be ready and responsive.

D Access all the basic function of the app through the icons.

ADJUST

Accurate and simple controls of colors. The commands will be recorded by the Innovalite, and the light will stay on when your phone is out of range.

MUSIC

The light will change according to the music stored in your phone. *This setting will work only when the phone is in Bluetooth range.

TAPE

Alter light to the sound caught by the microphone of your phone. *This setting will work only when the phone is in Bluetooth range.

STYLE

Choices of color changes: Strobe light, pulsating, transitions. *This setting will work only when the phone is in Bluetooth range.

Compatible with most of the smartphones using the following operating systems:

- ◆ The I Phones using the IOS 7.0 or newer.
- ◆ The Android-based smartphones with the version 4.3 or newer.

Bluetooth remote control for Innovalite RGB BT: range of approx 30 m (100')

See a more detailed user guide within the Innovalite application software.

Do not forget to protect your phone from water damage and enjoy !
